I have a strong concern regarding section 8:
Ascertaining the age of end-users of an entity's service

I believe that requiring age ascertainment of all individuals, including adults, is a breach of privacy and gives excess personal information to private companies.

This code, rather than "protect childrens privacy and data" will infact expose all Australians (including children) to greater privacy risk.

This draft should be reconsidered.

Thank you for the offer of consultation. I hope this code can be appropriately changed, for the privacy of all Australians.

A concerned adult Australian citizen.
